Joint Secretary (TAH&SC).

Subject: Setting up of Solar Park of 100 MW- 500 MW in the State of Manipur.

This is regarding setting up of Solar Park of 100 MW- 500 MW in the State of Manipur. The M/o New & Renewable Energy (MNRE), Govt. of India has launched a scheme of setting up of Solar Park upto 500 MW capacity at 25 locations in India including Manipur. A copy of the scheme is enclosed herewith.

In this connection it may be stated that the Manipur Tribal Development Corporation Limited (a State Government undertakings) is willing to be the Nodal Agency for implementation of the Project in the State of Manipur in collaboration with Amtech IT Systems Pvt. Ltd. New Delhi which is capable of handling such projects.

It is therefore requested that the MTDC may kindly be nominated as the Nodal Agency for the implementation of the proposed Solar Park in the State of Manipur.

New Delhi - 110 001.

Subject: - Setting up of solar Park 100 MW- 500MW in the state of Manipur,

Sir,

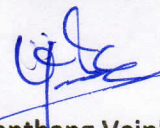

With reference to your letter No. Amtech/ Manipur-Solar/ By- hand dated 15/9/2015 on the subject cited above, I am to say that the MTDC Ltd. has pursued the matter with the Government of Manipur and obtained the approval of the Hon'ble Chief Minister, Manipur for nomination of the MTDC Ltd. as the nodal agency for implementation of the project in the state of Manipur. ( copy of the approval accorded in the U.O note enclosed)

In this connection, the MTDC Ltd. (A state Government Undertaking) has agreed to take up the said project in the state of Manipur in collaboration with AMTECH IT SYSTEM PVT. Ltd. New Delhi. However, the state Govt. orders nominating the MTDC Ltd as the nodal agency for the project is awaited which is expected shortly.

It is therefore, requested that the AMTECH IT SYSTEM PVT LTD. New Delhi may kindly initiate necessary arrangement to expedite the process for setting up of the Solar Park in the state of Manipur in the interest of the public.

Encl:- As above.

Yours faithfully,

( S. Minlhanthang Vaiphei )

Managing Director,  
Manipur Tribal Development Corporation Ltd.

Ministry of New and Renewable Energy**

10-December-2014 21:45 IST

**Implementation of scheme for setting up 1000 MW of Grid Connected Solar PV Power projects by CPSUs and GoI organisations under various Central / State Schemes / self-use / 3rd party sale / merchant sale with Viability Gap Funding under batch – V of Phase-II of JNNSM**

The Cabinet Committee on Economic Affairs (CCEA), chaired by the Prime Minister Shri Narendra Modi, has approved the scheme for setting up of 1000 MW of Grid-Connected Solar PV Power Projects with VGF (Viability Gap Fund) support of Rs.1000 crore, by CPSUs under various Central/State Schemes, in three years period from 2015-16 to 2017-18. The Scheme will have a mandatory condition that all PV cells and modules used in solar plants set up under this Scheme, will be made in India.

All States and Union Territories are eligible for benefitting under the scheme.

Solar parks will enable development of solar power in remote areas where land is inexpensive. As a transmission system will be developed for the entire Park, developers will not have to set up their own transmission lines. This will not only save money but will also avoid damaging the landscape of the area as only limited transmission lines would be laid.

Further developers would be able to set up projects quickly as they will not have to get statutory and other clearances.

India will emerge as a major solar power producing country as nowhere in the world are solar parks are being developed on such a large scale. The CPSUs and Government of India organisations will participate in various Central/State Government tenders, from time to time for sale of solar power to the State.

The State Government will first nominate the implementing agency for the solar park and also identify the land for the proposed solar park. It will then send a proposal to the Ministry of New and Renewable Energy (MNRE) for approval along with (or later) the name of the implementing agency. The implementing agency may be sanctioned a grant of upto Rs.25 Lakh for preparing a Detailed Project Report (DPR) of the Solar Park, conducting surveys, etc. The DPR must be prepared in 60 days.

Thereafter, application may be made by the implementing agency to Solar Energy Corporation of India (SECI) for the grant of up to Rs. 20 lakhs/MW or 30 percent of the project cost including Grid-connectivity cost, whichever is lower. The approved grant will be released by SECI as per milestones prescribed in the scheme.

**Background:**

The CPSUs and Government of India organisations like NTPC, NHPC, CIL, IREDA, Indian Railways, etc. are coming forward to set up solar power projects. The scheme has a provision of VGF support of Rs.1000 crore for setting up of Grid-connected solar PV power projects of 1000 MW aggregate capacity to be developed by CPSUs under various Central/State Schemes by using cells and modules made in India. Requisite funds for provision of the VGF support will be made available to MNRE from the National Clean Energy Fund operated by Ministry of Finance.

**Press Information Bureau  
Government of India  
Ministry of New and Renewable Energy**

**Implementation of scheme for development of Solar Parks and Ultra Mega Solar Power Projects**

10-December-2014 21:44 IST

The Union Cabinet, chaired by the Prime Minister Shri Narendra Modi, today approved the scheme for setting up 25 solar parks each with a capacity of 500 MW and above and Ultra Mega Solar Power Projects in various parts of the country where large chunks of land can be spared for this purpose.

These parks will be able to accommodate over 20,000 MW of solar power projects. The Solar Parks/ Ultra Mega Solar Power Projects will be set up during five years that is from 2014-15 to 2018-19 and will require Central Government financial support of Rs.4050 crore. Smaller parks in Himalayan and other hilly States where contiguous land may be difficult to acquire in view of the difficult terrain, will also be considered.

The solar parks will be developed in collaboration with State Governments and their agencies. The choice of implementing agency for developing and maintaining the park is left to the State Government. The States, applying under the scheme, will have to designate an agency for the development of the solar park.

The State Government will first nominate the implementing agency for the solar park and also identify the land for the proposed solar park. It will then send a proposal to the Ministry of New and Renewable Energy (MNRE) for approval along with (or later) the name of the implementing agency. The implementing agency may be sanctioned a grant of upto Rs.25 Lakh for preparing a Detailed Project Report (DPR) of the Solar Park, conducting surveys, etc. The DPR must be prepared in 60 days.

Thereafter, application may be made by the implementing agency to SECI for the grant of up to Rs. 20 lakhs/MW or 30 percent of the project cost including Grid-connectivity cost, whichever is lower. The approved grant will be released by Solar Energy Corporation of India (SECI) as per milestones prescribed in the scheme.

All the States and Union Territories are eligible for benefitting under the scheme. Solar parks will enable development of solar power in remote areas where land is inexpensive.

As the transmission system will be developed for the entire park, developers will not have to set up their own transmission lines. This will not only save money but will also avoid damaging the landscape of the area as only limited transmission lines would be laid.

Developers would be able to set up projects very fast as they will not have to get statutory and other clearances. India will emerge as a major solar power producing country as nowhere in the world are solar parks being developed on a large scale.

**Background:**

The Finance Minister, while presenting Budget for the year 2014-15, had amongst other things announced that the new and renewable energy deserves a very high priority and proposed to take up Ultra Mega Solar Power Projects in Rajasthan, Gujarat, Tamil Nadu, and Laddakh in Jammu & Kashmir for which he had set aside a sum of Rs. 500 crore in the Budget.

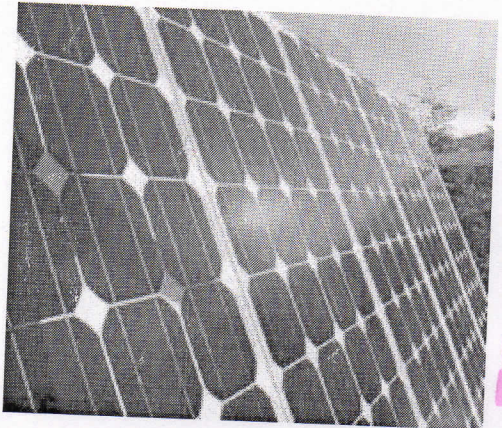

The scheme for development of Solar Parks and Ultra Mega Solar Power Projects has been conceived on the lines of the "Charanka Solar Park" in Gujarat which is a first-of-its-kind large scale Solar Park in India with contiguous developed land and transmission connectivity.

## NE states of India may get 100% Govt fund for solar projects: MNRE minister

5

If everything falls in place, the North Eastern states of India could get 100 per cent fund for setting up solar power projects, according to the union minister of new and renewable energy (MNRE), Dr. Farooq Abdullah.

Replying to a supplementary question in the Rajya Sabha, Dr. Abdullah said that the Centre was likely to clear the proposal for hundred per cent funding of solar power projects in the North East, with the MNRE endorsing the demand of the power ministers of the region.

The north eastern states get 90 per cent assistance from the Government of India for setting up solar projects. Recently, Dr. Abdullah had met the power ministers of the north east who had demanded that the center should increase the funding of solar projects from 90 per cent to 100 percent, as they were not in a position to even bear 10 per cent of the cost.

Dr. Abdullah informed the House that he has already put the matter before the Prime Minister and the Finance Minister saying that for the north eastern states, the assistance from the Centre should be increased to 100 per cent, to enhance the growth of the renewable energy sector in the region.

The minister said that the basic reason for providing assistance to the north east is because a number of areas in those regions are ones, where transmission lines have not reached, and it would take a long time for the same to happen.

The minister said that his ministry was not only helping north east but other parts of the country as well. He said that the government has various plans and programs, however, the matter of concern in India is the higher cost of production for generating solar energy as compared to other countries.
